

Arcadia Agro is a leading plant biotechnology company situated at Mogar village, 25km from the city of Vadodara, Gujarat, India. We are considered to be among India's most important producers of Gerbera and Banana plants through Tissue Culture technology.

Arcadia Agro operates a laboratory where it propagates the utmost quality varieties, disease free and high yield Gerbera saplings to satisfy growing local and global demand. We pride ourselves in adhering to strict and accurate production procedures, updated with the latest developments in Tissue Culture technology.

Arcadia is also the sole producer of Gerbera varieties for Montiplanta LDA of Portugal in India. A hi-tech agricultural company, with over 20 years of breeding experience, Montiplanta's Gerbera varieties thrive in high temperature and high solar exposure areas. Over the years, Arcadia has established itself as a reliable grower and supplier of Montiplanta varieties suited to the Indian climate which can also be successfully grown by local farmers.

At Arcadia Agro, our mission statement is simple; *"We specialize in generating the best disease resistant and maximum yield plant varieties, because, no one knows produce better than we do."*

Our other Products:

- * Banana Tissue Culture Plants
- * Carnation Rooted Cuttings, Selecta Cut Flowers, S.A.U, Spain
